

Guru Verify

Mobile and web app for quicker, more cost effective acceptance testing

Guru Verify lets you verify network performance in line with ADE/CIBSE Heat Networks Code of Practice 2020 in up to 90% less time.

Test 100% of dwellings easily, saving time and money, leading to better outcomes for your heat network.

- ✓ Define testing criteria and check dwelling status remotely via the web app
- ✓ Real time centralised results support same day repairs
- ✓ Useful commissioning certificates help hold your supply chain to account
- ✓ Benchmark for future maintenance and efficiency improvements
- ✓ Easy to use - designed for all levels of expertise

Reduce heat losses by more than two-thirds

Real-world results from a 2016 project delivered by Guru in partnership with FairHeat and in collaboration with the UK Government showed that proper commissioning alone can reduce heat losses on networks by more than two-thirds.

Improve resident outcomes

Acceptance testing has been shown to improve the resident experience by significantly reducing maintenance call outs and driving lower prices.
